Experience

- Member of the Technical Committee** Feb. 2026 - Present
Software Interoperability Olympiad (AcadNet)
• Evaluating & proposing C++ debugging problems
- Junior Instructor** Aug. 2025 - Present
Hackademy
• Teaching CCNA3 to university students
- Computer Operator** 2024 - 2026
Pieczarki Podlaskie Export SRL
• WordPress development, online shop management, blog posts & SEO optimization

Education

- University Politehnica of Bucharest** 2024 - 2028
BSc in Computer Science and Engineering, Faculty of Automatic Control and Computers
Relevant Coursework: Data Structures and Algorithms, Algorithm Design and Analysis, Object-Oriented Programming, Operating Systems, Linear Algebra, Numerical Methods, Probabilities and Statistics

Awards

- **Mention 4th Place** -Hackitall, SAP Challenge Dec. 2025
- **2nd Place** -Hackitall, Amazon Games Challenge March 2025
- **3rd Place** -NXP Autonomous Cars Final Competition - Aug. 2025
- **3rd Place** -SSS Final CTF July 2025

Projects

- DraWar** 🔗
Technologies: Python, FAST API, PyTorch, WebSockets, Google QuickDraw database for training
Multiplayer drawing game where players compete to have their sketches recognized by an AI model, using WebSocket communication and a custom trained neural network for image recognition.
- Rotables Optimization System** 🔗
Technologies: Java, OOP, Greedy optimization, REST APIs
Built a system to optimize rotatable kit logistics in a hub-and-spoke network, adjusting kit loading and purchasing based on real time flight and inventory data to reduce costs.
- 2D Game - Exillion** 🔗
Technologies: Godot, Python, numpy, torch, tensorboard, renpy
A 2D game developed during a hackathon in 48h, featuring an intriguing plot where life becomes currency, enemies are trained with AI and your progress depends on what decisions you take.
- Local-Vibe Community App** 🔗
Technologies: React, TypeScript, GoogleMaps API, Firebase (authentication, deployment and database)
A community app that helps users discover nearby events through an interactive map and an AI chatbot that recommends activities based on mood and preferences; event hosts can add their own events.

Certifications

- CCNA1 & CCNA2 & CCNA3** July 2025
Cisco Networking Academy
- Training in Basic Quantum Knowledge** May 2025
RoNaQCI & UNSTPB
- Python Programming 101 Certificate** Feb. 2025
Cisco Networking Academy

Hackathons & Courses

Google Developer Group Hackathon, Hackitall, Eestec-Olympics Bitdefender, RoNaQCI Hackathon, Perpetuum IPWorkshop- Autonomous Car Course by NXP, Security Summer School- Essentials Track, WEB102

Skills

C, C++, Python, Matlab, Assembly, Java, JS, TS, Linear Algebra, Numerical Methods, Bash, Makefile, Regex, HTML, CSS, Flask, React, Git, Docker, Linux System tools, GDB, objdump, binary exploitation, Godot

Extracurricular Activities

- Active LSAC Volunteer; former VicePresident of BratianuHelp Organization
- Volunteered in organizing the Applied Informatics Olympiad & was in charge of grading students' solutions
- Black Belt and World Champion in Ashihara Karate (Seniors, Japan); Athlete of the year 2024
